

## Participant Certificate

### WMS Database

The Fraunhofer Institute for Material Flow and Logistics confirms that

### Unitechnik Systems GmbH

is a participant in the WMS Database for the evaluation period  
2019/2020 with the software system

### UniWare 2019

The WMS Database is a service provided by the Fraunhofer IML and involves the evaluation of more than 3.700 individual aspects. This includes information concerning the functionality of the software with all the usual functions and processes of a warehouse and additional services provided by the software vendor. Approximately 2.600 individual aspects of the system have been verified by Fraunhofer IML employees in collaboration with the WMS vendor.

The verified data are available for potential customers and other stakeholders of Warehouse Management Systems in the WMS Online Selection on [warehouse-logistics.com](https://warehouse-logistics.com). The database therefore offers a simple, efficient and vendor-independent method for the pre-selection of Warehouse Management Systems. The validation seal is only awarded after the complete validation and affirms the evaluated functional scope of the WMS.

The certification DIN EN ISO 9001 of TÜV NORD CERT GmbH emphasises the high quality and proper implementation of the validation services in the area of warehouse logistics.

Dortmund, 19<sup>th</sup> September 2019
